

A muscular man with a shaved head and a small patch of hair tied in a bun is shown from the back, flexing his back muscles. He is wearing blue briefs. The background is a beach scene with palm trees and a sunset. A woman's face is visible in the upper right corner.

6 WEEK SHRED

THE BEAST OF THE BEACH

Prepared exclusively for transloges.saroj@gmail.com Transaction: 14376

The daylight lingers as the night retreats. The sun warms the sands and silences the chilling winds of the dark. Warmth has cast out the winter cold and sounds of its triumph beckon us from our homes.

People return to the streets as we reclaim our land from the frozen months of winter. The streets flood and the world come alive. The humid air is electrified in an almost magical sense.

But something stirs.

Among the crowded onlookers, something lurks. Beyond the herds of beach chairs and towels exists something powerful.

The average beach goer shrugs off the sightings. Children and adults whisper of the behemoth, afraid to raise their voices lest the creature may hear.

Its size is legendary. Its bulking figure denies the ground the summer sun leaving darkness in its wake. It moves with powerful purpose. The tumultuous waves crash across its gargantuan shoulders as it emerges from the salty depths of the sea. The sea itself seems to swirl around this creature with wondrous awe.

THE
BEAST
OF THE BEACH

Yet, it is not its size alone that stirs the whispers of urban legend. The world is full of lumbering, robust creatures. No, it is something far different that makes this beast the stuff of legend. Those who look upon it with craned necks, afraid of attracting its gaze. It is the muscular physique that separates this myth from man.

The beast's chiseled form is carnal and ancient. It is the same that inspired fear and reverence in ancient sculptures. It walks as a man, but its prominent muscles refute the ruse. No man can be this powerful.

Denial is natural. We crave the comfort of the known and dismiss realities that clash with our own. Yet, you yourself have undoubtedly seen one of these beasts. They appear without warning to the gasps and amazement of the few. It is here that you will discover the nature of the behemoth.

Follow in his footsteps and watch as your skin grows taut, your vascularity spreads like hungry roots, and people gaze in awe. Beware, for you are on the journey to becoming... **BEAST OF THE BEACH.**

I. SECRETS OF THE BEAST

II. THE BEAST'S DIET

III. THE FOOTSTEPS OF THE BEAST

SECRETS OF THE BEAST

THE CREATURE'S DIET

Beasts of the Beach are sighted across the globe. Locals describe them in their own dialect, but the beast itself remains the same. This also applies to their dietary choices. Each beast has certain foods and preferences, but the core of their choices remain consistent regardless of region.

Across the vast oceans, you will find beasts grazing on a varied diet. Still, this diet must be tethered to a specific formula. It is within this formula that you will find the alchemical transformation from man to myth.

THE CREATURE IS NEVER SATIATED

We associate power with consumption. If we consume more, then we will be more. Therefore, fanatical devotees choose protein and healthy fats into an awe-inspiring physique, hoping to trigger the transformation. If it was this simple, then beast sightings would not demand such amazement.

Truthfully, the beast must consume the proper calories and macronutrients to alter their physical form. To reveal the form of beast, we must carve away the prison of man. This requires eating less calories than you consume. To do this, you must use an equation to find out how many calories you burn per day. First you will find your BMR or Basal Metabolic Rate. This is how much you burn per day at rest. Then, you must multiply this number by a variable depending on daily activity level. To acquire your TDEE or Total Daily Energy Expenditure. Eat less calories than this number on a consistent basis to peel away your mortal coil and find the beast within.

SECRETS OF THE BEAST

NOT COMMITTING TO THE CHASE

The beast is ferocious and driven. It knows only the hunt for perfection. It's solitary and focused mindset is mirrored in its form fitting physique. The exact transformation from man to beast can only be triggered with a precise regimen.

This is where the average beast hunter loses track. We notice the mountains. We see the towering pines and hear legends of humungous creatures. Our vision shifts, and we try to chase both monsters. We run wildly as the seasons change. Eventually we are lost in a world where neither creature is within our grasp.

You are ready, and with these notes, so you are far from average. The journey to become a Beast of the Beach demands your respect and total attention. You cannot gain mass while becoming shredded. Gaining muscle requires eating more than you burn. As discussed on the previous page, you must eat less than you burn to lose fat. If you chase both goals, you will find yourself exhausted while both beasts escape your grasp. Fear not, once you have become the Beast of the Beach you will be primed for the massive hunt ahead.

SECRETS OF THE BEAST

THE BEAST GRAZES

Beasts roam the coasts, consuming nutrients to power their brawny form. The beast must choose nutrient, fiber rich food sources to maintain its transformation. If the beast consumes excess fried foods, sugary drinks, and excessive alcohol, he will return to his mortal form.

The beast must choose high quality proteins and high-volume, lower calorie foods to maintain his shredded form. One cannot overcome calories in vs calories out. You will still need to eat less than you burn to lose fat. However, you can control your level of satiation through dietary choices. Eating foods that fill your stomach trigger stretch receptors which inform the brain that you're feeling full. Below are some higher volume food choices to help you keep food intake high while controlling for calories.

MIRACLE NOODLES
3 OZ- 15 CALORIES

OATMEAL
½ CUP- 150 CALORIES

CAULIFLOWER RICE
3.5 OZ- 25 CALORIES

SWEET POTATO
5 OZ- 110 CALORIES

EGG WHITES
1 LARGE- 17 CALORIES

ALL BRAN CEREAL
½ CUP- 80 CALORIES

SECRETS OF THE BEAST

AIR POPPED POPCORN
1 CUP- 31 CALORIES

STRAWBERRIES
5 LARGE STRAWBERRIES- 29 CALORIES

APPLES
1 MEDIUM- 95 CALORIES

ORANGES
1 MEDIUM- 69 CALORIES

WATERMELON
10 OZ- 86 CALORIES

VEGETABLES
VARIABLE

BEAST KILLERS

The beast of the beach is a towering monster who seems impervious to harm. He is swift, muscular, and powerful. Only a fool would dare try to pierce the beast's formidable hide. Still, the beast knows that it is not invulnerable. Each beast can be felled by only one thing, its own hand.

A beast can slay itself through self-sabotage. Weekend binges and alcoholic beverages can reverse the progress you've made. You must consistently be in a caloric deficit. It doesn't matter how strong and dedicated you were during the week, you will never truly capture the beast without complete commitment. For example, if you have 2000 calories per day during the week but 4000 calories on weekends, your average caloric intake is over 2500.

SECRETS OF THE BEAST

CALORIC INTAKE CHART

THE DIET OF THE BEAST

This diet is the simple yet elusive secret to capturing the beast. Uncover your dietary needs to become the legend you seek.

STEP 1: Use one of the below equations to determine your BMR

CHOICE 1: MIFFLIN ST JEOR

MEN: $10 \times \text{weight (kg)} + 6.25 \times \text{height (cm)} - 5 \times \text{age (y)} + 5$

WOMEN: $10 \times \text{weight (kg)} + 6.25 \times \text{height (cm)} - 5 \times \text{age (y)} - 161$

CHOICE 2: KATCH MCARDLE:

Use this if you know your body fat percentage. First use your body fat percentage to find your lean body mass.

Lean Body Mass = $\text{Weight in kg} \times ((100 - \text{Body Fat \%}) / 100)$

BMR = $370 + (21.6 \times \text{Lean Body Mass(kg)})$

STEP 2: Use one of the below equations to find your current TDEE

BMR X 1.2= Sedentary Lifestyle (no workout)

BMR X 1.4= Workout 1-2 Times Per Week

BMR X 1.5= Workout 2-3 Times Per Week

BMR X 1.6= Workout 4-5 Times Per Week

BMR X 1.7= Workout 6-7 Times Per Week

BMR X 1.8= Workout 2 x per day

STEP 3 CREATE YOUR DIET: WEEKS 1 AND 2:

Multiply Your TDEE by 0.8 to get your Week 1 and 2 calorie intake

Determine Your Macronutrients

Protein in grams= $(\text{Bodyweight} \times 1.2)$

Fats in grams= $(\text{Calorie intake} \times 0.20) / 9$

Carbs: $[\text{Caloric intake} - ((\text{protein in grams} \times 4) + (\text{fats in grams} \times 9))] / 4$

THE DIET OF THE BEAST

STEP 4: WEEKS 3 AND 4

Multiply your Week 1 and 2 calorie intake by 0.9

STEP 5: WEEKS 5 AND 6

Multiply your Week 3 and 4 diets by 0.9

EXAMPLE: A 6-foot-tall, 23 year old man looking to transform this summer weighs 200 lbs. He works out 5 times per week and does not know his body fat. Below would be his calculations.

HINT: To convert lbs to kg, divide lbs by 2.2. To convert in to cm, multiply by 2.54.

Mifflin St Jeor Equation:

MEN: $10 \times \text{weight (kg)} + 6.25 \times \text{height (cm)} - 5 \times \text{age (y)} + 5$

$10 \times 90.9 + 6.25 \times 182.88 - 5 \times 23 + 5$

BMR= 1942 calories

$1942 \text{ calories} \times 1.6 = \text{TDEE of } 3107 \text{ calories}$

WEEK 1 AND 2 DIET

$\text{TDEE} \times 0.8 = 2485 \text{ calories}$

$200 \times 1.2 = 240 \text{ g protein}$

$2485 \times 0.2 = 497 / 9 = 55 \text{ g fat}$

$2485 \text{ calories} - (240 \times 4) + (55 \times 9) = 1030 / 4 = 257 \text{ g carbs}$

WEEK 3 AND 4 DIET

$2485 \times 0.9 = 2236 \text{ calories}$

240 g protein

50 g fat

206 g carbs

WEEK 5 AND 6 DIET

$2236 \times 0.9 = 2012 \text{ calories}$

240 g protein | 45 g fat | 162g carbs

THE BEAST'S FOOTSTEPS

You have prepared for the hunt. You have uncovered the creature's secrets and have focused your thoughts. Now it is time to walk his path. This workout will challenge you. It will strip away your mortal form with each set and rep. Remain vigilant. Soon another beast of the beach shall walk amongst us...

THE BEAST'S FOOTSTEPS

CARDIO

Before each workout perform 30 minutes of cardio of your choice.

THE BEAST'S FOOTSTEPS

ABDOMINALS

Perform two of the below ab exercises before beginning the lifts of the day.

Ab Choices:

3 sets of 30 leg lifts

3 sets of 30 decline crunches

3 sets of 30 oblique crunches

3 sets of 30 rope cable crunches
